Data and Reporting: PhpSpreadsheet, Excel Import and Export, CSV Processing, PDF Reports, Dashboards, Data Validation

Enterprise Development: Maker/Checker Workflow, Approval Workflow, Role-Based Access Control (RBAC), Audit Trail, Queue Management, Batch Processing

Practices and Tools: Git, Code Refactoring, Legacy Modernization, Security Best Practices, Performance Tuning, Unit Testing

PROFESSIONAL EXPERIENCE

Associate Programmer, MicroMac Techno Valley Ltd.
Jan 2026 - Present | Full-time

- Develop, test, and maintain software applications in collaboration with senior developers.
- Implement features, enhancements, and bug fixes according to functional and technical specifications.
- Debug and resolve issues across application modules, and support routine system maintenance.
- Work with senior programmers and technical leads to design and deliver solutions to technical challenges.
- Unit test assigned modules, report defects, and support the QA team with test data and functional testing.
- Follow coding standards, best practices, and security guidelines so that code meets quality and functional requirements.
- Document developed code and procedures, and take part in code reviews and team knowledge sharing.

Assistant Programmer, MicroMac Techno Valley Ltd.
Jun 2023 - Dec 2025 | Full-time

- Assisted in coding, testing, and maintaining software applications under the guidance of senior developers and team leads.
- Implemented features, bug fixes, and minor enhancements based on defined specifications.
- Helped identify and debug issues in applications and modules, and supported routine maintenance and minor updates.
- Performed unit testing for assigned tasks and reported defects and anomalies.
- Prepared test data and supported the QA team during functional testing.
- Maintained documentation for code, procedures, and task updates.

PROJECTS

FX Return Reporting Solution - Supported the product and built new modules for a platform that automates foreign exchange returns for banks in Bangladesh Bank's FI Master report format and RIT, including schedules, statements, and text and XML soft copies.

Credit Return Automation - Supported the product and built new modules for software that generates regulatory credit returns, including stress testing, large loan, CAMELS, and SME loan disbursement statements.

PSED (Private Sector External Debt) Reporting - Developed the module, including data feeding and report generation for internal use and for submission to Bangladesh Bank.

FDI (Foreign Direct Investment) Reporting - Developed the module, including data feeding and report generation for internal use and for submission to Bangladesh Bank.

CSMS: Collateral Security Management System - Supported the product and built new modules for a web-based system that captures collateral data with regulator-defined validations and Core Banking System integration.

goAML Middleware - Supported the product and built new modules for middleware that bridges a core banking system and the Bangladesh Bank goAML portal, generating schema-compliant Currency Transaction Report (CTR) XML files.

Write-off Management Tool - Supported the product and built new modules for a tool that manages non-performing loan write-offs, with Excel data upload, repayment and recovery tracking, and MIS reports.

A1Queue: Queue Management System - Supported the product and built new modules for a queue management system with kiosk token generation, real-time queue monitoring, role-based access control, and analytics.

Akhter's MRCPCH: Online Course Platform - Supported the site and built new modules for an e-learning platform offering exam preparation courses, bundle courses, and one-to-one consultation.

EDUCATION

Bachelor of Science (BSc) in Computer Engineering
Bangladesh University of Business & Technology (BUBT)
Oct 2017 - Dec 2021 | Grade: 3.60

PUBLICATIONS

BLS: Bank Loan Sanction Using Blockchain Authenticity, Transparency and Reliability
IEEE, Sep 14, 2021 | ieeexplore.ieee.org/document/9641104

CERTIFICATIONS

Communication Masterclass by Tahsan Khan, 10 Minute School
Issued Jan 2023 | Credential ID: 63c9596786c7c
